

PROFHILO®

WHERE OTHERS SEE HYALURONIC ACID,
WE SEE THE FULL POTENTIAL OF YOUR SKIN.

IBSA DERMA. BEAUTY BEYOND STANDARDS.

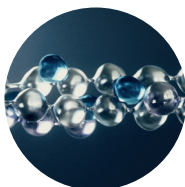

IBSA: Innovation and Quality in the Pharmaceutical Sector

IBSA is a pharmaceutical multinational, inspired by the innovation of therapeutic solutions capable of improving the quality of life of patients, and shaped by a sense of responsibility that goes beyond drugs.

Ultrapure Hyaluronic Acid: Internationally Recognized Excellence

IBSA's Ultrapure hyaluronic acid is characterized by a high degree of purity and quality, which is internationally recognized.

Advanced Technologies: NAHYCO® Hybrid Technology

IBSA has developed new technologies like the NAHYCO® Hybrid Technology, which introduces a new world of hyaluronic acid represented by stable hybrid cooperative complexes. It is a new entity of both high- and low-molecular weight chains of hyaluronic acid stabilized through a thermal process, without any chemical agent.

IBSA Derma:

Celebrating the Unique Beauty of Each Individual

IBSA Derma, the division of IBSA dedicated to aesthetics medicine, celebrates the uniqueness and authentic beauty of each individual, moving away from a world where beauty is standardized.

PROFHILO® PRODUCT LINE:

The Revolution in Injectable Treatments

The NAHYCO® technology gave life to the PROFHILO® PRODUCT LINE, which includes injectables such as:

PROFHILO® FOR FACE AND NECK

PROFHILO® BODY

PROFHILO® STRUCTURA (THE NOVELTY)

Born from the association of high and low molecular weight HA chains, stabilized through a patented thermal process, without the presence of any chemical agents:

PROFHILO®

What makes PROFHILO® the extraordinary pioneer of bioremodeling, is its ability to restore skin firmness, tone, and elasticity.¹

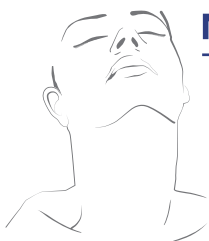

PROFHILO® intervenes in the physiological process of skin aging. PROFHILO® is indicated for:

- **FACE AND NECK TREATMENT**
and for **SKIN LAXITY REMODELING**¹
- In **DERMAL TISSUE REPAIR PROCESS**,
in cases of **ACNE SCARS**¹

FACE

Ideal for those experiencing face skin laxity and the signs of aging, such as loss of tone, firmness, brightness, and hydration of the skin face.

NECK

Ideal for those experiencing neck skin laxity with the typical signs of aging, such as loss of tone, firmness, brightness, and hydration or the presence of horizontal lines in the neck area.

ADVANTAGES

- Only 10 injection points for each area (ex: 5+5 for the 2 sides of the face)¹
- Effective and minimally invasive technique developed thanks to the features of high spreadability; once injected in boluses, achieves a homogeneous result²

It is advisable to do an initial cycle of **TWO TREATMENT SESSIONS WITH AN INTERVAL OF 30 DAYS** between one and the next, possibly followed by maintenance sessions every 2 months.¹

FACE & NECK TREATMENT

SELF EVALUATION EFFICACY OF THE APPLICATIONS*

FACE³

Improvement in skin firmness	84%
Improvement of superficial wrinkles	79%
Improvement of skin smoothness	80%
Improvement in skin brightness	77%
Improvement in skin hydration	86%

SELF EVALUATION EFFICACY OF THE APPLICATIONS*

NECK⁴

Improvement in skin roughness	87%
Improvement in skin laxity	92%
Lifting effect	96%
Improvement in skin suppleness	96%
Improvement in skin hydration	96%

* Sum of medium, marked and very marked judgements 4 months after the first injection
